(3) WEIGHTS AND MEASURES.

Weights and Measures in common use and their equivalents in Imperial Weights and Measures.

WEIGHTS AND MEASURES.

Before the introduction of the decimal system of weights and measures by the late German Government the following standard weights and measures were in use among the natives:—

CAPACITY.

- 1 Kibaba equal to about 1 pint or $1\frac{1}{2}$ lbs.
- 1 Pishi ... 4 Kibaba
- 1 Frasila ... 6 Pishi
- 1 Jizla ... 10 Frasila

WEIGHT.

- 1 Ratili equal to about 1 lb.
- 1 Wakia ... 1 oz.

LINEAR.

- 1 Shibiri equal to about 9 inches: roughly based on the span with the thumb and little finger extended.
- 1 Mkono ... 18 inches: calculated on the length from the finger tips to the elbow.
- 1 Wari ... 1 yard.

The late German Government, about 1910-11, introduced the litre and metre as a standard measure, 1 litre being about $1\frac{3}{4}$ pints and 1 metre to 3.34 feet.

The natives, however, continued to use the terms "pishi" and "kibaba" to denote the new measures of 4 litres and 1 litre capacity, although the metric measures were of greater capacity than the actual native measures.

There exists also an unofficial but universally recognised unit of measure known as the "debe." This term is applied to the European kerosene tin which, in consequence of its suitability for head portage, has been adopted by the native as a convenient receptacle for the conveyance of grain to market.

On the introduction of the metric system by the late German Government the official unit of weight became the kilo and both the native measure "ratili" (pound) and the kilo are now in common use in the native market.

The unit of linear measure became the metre and this measure with its sub-division, the $\frac{1}{2}$ and $\frac{1}{4}$ metre, is still employed.

The question of the abolition of the metric system and the adoption of the Imperial Weights and Measures, with certain modifications suitable to local conditions, is now under consideration.

ended 31st December, 1924 and 1925.

NOTE 1.—The Concessions to Messrs. T. G. McGowan & M. P. Chitale were granted during the year.

NOTE 2.—Mohamedali Jivanjee's concession expired on December 31st, 1925.

NOTE 3.—Many licences have been issued to individuals to take timber, fuel and other forest produce. They did not confer a sole right of exploitation in any particular area and were not concessions in the true sense. Produce taken on these licences is included in (b).

(d)

General information regarding the industry and possibilities of development.

The figures given in Section (b) above show in every case increases over the figures for the preceding year. This is particularly marked in the cases of timber, tanning barks and fuel. The consumption of forest produce, chiefly timber and fuel, is increasing and must continue to increase in conformity with the growing prosperity and trade development of the Territory.

Forest exploitation is entirely in the hands of private enterprises.

The sawmills at present operating in the forests cannot be considered thoroughly efficient in organization and output in respect of either quantity or quality of material. One lumbering firm has installed seasoning plant embodying the latest scientific principles. More general use of such plant in the Territory especially in finishing Yellow-wood lumber will profoundly influence the timber trade.

Unfortunately trade in Pencil Cedar has received a temporary check owing to some difficulty in seasoning and softening the wood, which has not yet yielded to experiment.

Untouched supplies of merchantable timber exist in quantity far exceeding the local demand but the present inaccessibility of forests due to lack of means of communication lessens the scope for lumbering enterprise.

Mangrove bark for tanning purposes has continued to be in strong demand. The output from the local mangrove woods has increased from 247 tons in 1924 to 3,068 tons in 1925.

There were also mined during the year 30 tons of Tin Stone and 411 carats of Diamonds of which the values are not yet available.

(b) State Area which has been geologically surveyed. Note any important mineral deposits known to exist, but not at present worked.

A Geological Department has been constituted, and will commence operations early in 1926.

The principal mineral deposits known to exist in the Territory are Coal, Iron, Graphite, Pitchblende, Copper, Soda and Garnets.

The training of the African members of our staff has continued and their number increased to about 160. The system of apprenticeship introduced last year is proving successful and beneficial in its influence on the youths engaged.

Instruction has been given throughout the year in animal husbandry and management in health and disease, improved methods of ghee production and preparation of hides and skins, with obviously satisfactory results.

Research and experimentation in the field of animal eugenics are being conducted in the Government Stock Farm, close to Dar es Salaam, from which stud animals are distributed to our various stations throughout the Territory. Breeding experiments have been and are being made with cattle, sheep and goats, both of the indigenous and imported strains, and the effects of crossing the African buffalo with the Indian will be observed later. During the year the first result of mating a zebra mare with a Muscat donkey was born, and will in due course be the subject of investigations on the utility of such an animal for domestic purposes and its relative tolerance to trypanosomiasis and other diseases.

The Pathological Laboratory and Serum Institute, Mpwapwa, in addition to its other functions, prepared an adequate supply of anti-rinderpest serum for our own requirements and exported that product to adjacent dependencies to the value of close on £4,000. The total amount of anti-rinderpest serum manufactured during the year was approximately five million cubic centimetres, which could have been increased had the necessity arisen.

Land. The Land Ordinance which was enacted in 1923, provides for the granting of Rights of Occupancy for any period up to 99 years.

The bulk of the area alienated during the year under review was for cotton and sisal cultivation, near the Central Railway.

Many plots have been granted in the trading centres, and also in the new cotton market centres along the Central Railway and in the Lindi and Mwanza district.

Only a few areas were granted in the Rungwe district and none in the Iringa district, pending the completion of a flying survey to ascertain what lands were available in these districts. The survey was completed at the end of the year.

One ginnery site and twenty-three factory and godown sites were alienated during the year.

Mining. Diamonds. The principal item of interest during the year was the existence of a diamond field at Mabuki, Mwanza, being definitely established. Over 130 claims have been pegged comprising an area of some 5 square miles, though a centre group of 14 claims only has so far shewn anything tangible in 411 carats of diamonds of superior quality which were obtained in the course of testing. Machinery is now being installed on some of the claims which should enable a good output for 1926 to be expected.

Mica. The output of Mica has increased to an extent of approximately 25 per cent over 1924. Morogoro produced 36 tons, Ufipa 27 tons and Usambara 4½ tons. Ex-enemy mining properties which had formerly been reserved to the Government have been thrown open, thus allowing a larger area to be exploited.

Gold Reef. The output from the Mwanza district for the year was only 152 ozs as against 309 ozs for 1924, the low production being chiefly due to scarcity of labour and to claim-holders concentrating on development work and installation of machinery.

The Sekenke Gold Mine produced 808 ozs, but for the last quarter of the year there was no output owing to renovations to plant being necessary.

Gold Alluvial. The output from the Lupa River area has increased, shewing a figure of 9,160 ozs. as compared with 811 ozs. for the previous year. The number of prospectors engaged has augmented to about 150. Further rivers during the year have revealed traces of gold in payable quantities.

Tin. Extensions of the Tin deposit at Bukoba have been found during the year, occurrences having been discovered in outlying creeks. During the year permission was given to export 30 tons of Tin Stone.

Coal. In Ufipa district an area of 48 square miles has been applied for under an Exclusive Prospecting Licence. The samples of coal have been found to be of a good quality, and there are indications of an extensive deposit. Serious work has not yet commenced, the difficulties of transport being under consideration.

Salt. The output for the year was slightly less than that for 1924, being due chiefly to lease and claim-holders concentrating on the establishment of concrete reservoirs and basins for evaporating plant.

General. The output of minerals for the year did not come up to expectations. In some cases, particularly in regard to Gold Reef mining, this was mostly owing to the necessity of development work and installation of plant. There are indications, however, that 1926 will be a record year in every branch of mining in the Territory.

624 claims have been registered during the year of which the particulars are as follows:—

*By "Penal Imprisonment" is meant imprisonment inflicted as a substantive punishment in pursuance of a sentence of a Court of Justice, as distinguished from imprisonment for safe custody, etc.

Questions.

Answer.

I. If the prison is on a separate system, is the separation complete? And, if not what is the separation enforced by day and night respectively?

- (a) No.
 (b) By day in gangs; 1 Warder to 6 Convicts.
 (c) By night in associated Wards and Cells, lighted from outside with secured doors and a sentry on guard.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

A sentry patrols regularly; all female prisoners are segregated from males.

III. How many cells are there; and how many associated wards?

(See list attached).

Questions.

Answers.

XI. What was the annual amount of the prisoners' earnings during 1925?

Not computed.

XII. What is the number of the hours allotted for sleep? And, if sleep is in association, are the dormitories lighted? and how often are they patrolled during the night?

11 hours.

Yes, from outside.

Regularly every $\frac{1}{2}$ hour and at irregular intervals.

XIII. What were the number and nature of the punishments inflicted for offences committed by prisoners undergoing imprisonment?

Corporal Punishments	116
Loss of remission	109
Solitary confinement	38
do. do. with Penal diet	197
Penal diet	143
Extra imprisonment	19
Reprimands	1
Total	623

XIV. Is there, or are there, any Chaplain or Chaplains of any, and what, religious persuasions?

No Chaplains appointed.

XV. Are religious services regularly, or otherwise, performed for the benefit of the prisoners of any, and, if any, what, religious persuasion?

No.

Prisoners professing Christianity are permitted religious exercises on Sundays.

XVI. Are Roman Catholic Priests and Dissenting Ministers allowed free access to prisoners of their own persuasion? and are they apprised when prisoners of their respective persuasions enter the prison?

Yes.

No.

XVII. What provision is made for the education of prisoners?

Industrial Training only.

XVIII. On what conditions are remissions of imprisonment granted?

Prisoners sentenced to over 6 months are awarded remission of sentence for good conduct. The maximum remission is one-seventh of sentence after completion of six months imprisonment.

XIX. Have Coroners' Inquests been held on every occasion of a death in prison during the past year? And what were the verdicts?

Magisterial Inquests have been held on every occasion of a death in prison during the year. All verdicts were "Death from Natural Causes."

XX. 1. What was the sanitary state of the prisons during the year 1925?

Very good.

2. What were the prevailing diseases?

Malaria Fever, Bronchitis, Influenza, Pneumonia, Ankylostomiasis.

XXI. What are, shortly, the rules as to Diet?

See list attached.
